

Pre-Planer VH-120 / VH-170 / VH-220

High Capacity 3-side Pre-Planer for Solid Parquet and Top Layer Blocks

Solid Parquet
Top Layer Blocks

3-side pre-planer for high capacity (feed speed 15 - 50 m/min.) specially for short blocks from min. 200 mm length.

Operation completely from front and by PLC-Touch-Panel on moveable arm, with large CE-safety hood (max. 84 dB/A).

Heavy upper feed chain with 2 individually adjustable, pneumatic pressure systems. Motorized height adjustment of the feed chain system via PLC-control.

Working width from 35 up to 120 mm (VH 120) and 170 mm (VH 170) or 220 (VH-220), respectively.

Bottom and top planer shaft mounted at 30°, even for thin and twisted battens without deep cuts. Depending on version with additional support bearings

Cutter blocks with indexable TC inserts on hydro-sleeves. Top planer shaft with concentric, pneumatic pressure bars.
